Mounted Spare Tire & Wheel

STANDARD 12 MONTH LIMITED WARRANTY

12 Month, 1200 Hour Warranty (whichever occurs first)*

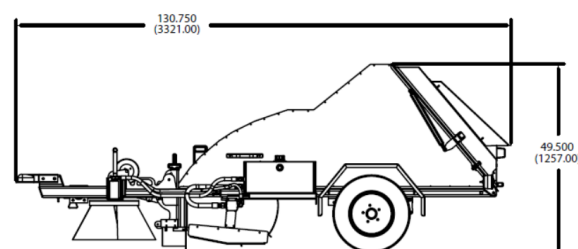

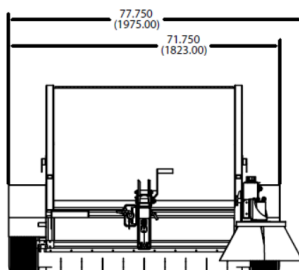

* Please read actual warranty for details and limitations.

* Specifications subject to change. *Model shown with optional equipment.

Victory Sweepers' Model T600 is a revolutionary sweeper capable of collecting a wide range of debris from almost any surface. From parking lots and construction sites to city streets, the T600 easily picks up litter, bottles, cans, rocks, asphalt, sand, sticks, leaves, grass — and even heavy construction debris. The T600's lightweight design enables it to be towed by a wide variety of vehicles, from standard cars and trucks to ATV's and tractors. Its narrow platform is ideal for sweeping bike paths and other areas inaccessible to conventional sweepers. The T600's simple design keeps maintenance to a minimum resulting in a lower operating cost and maximum uptime. The T600's debris hopper is constructed from high grade stainless steel to virtually eliminate rust and corrosion, providing years of service. Powered by a fuel efficient Honda 5.5 hp engine, the T600 can operate an entire eight-hour shift with only 1.5 gallons of gas.

Users of the Victory T600 include:

Parking Lot Sweeping Companies, Landscape Companies, Construction Companies, Street Departments, Parks and Recreation Departments, Amusement Parks, Resorts, Pavement Contractors, Striping Companies, Waste Facilities, Distribution Centers, Warehouses, Trucking Companies, Fairgrounds, Asphalt Companies, Landfills, Airports... and More!
